sensor gathers information about the vehicle's camshaft speed and sends it to the vehicle's engine control module

(ECM).The ECM uses this data to determine the timing of the ignition, as well as the timing of the fuel injection that the engine requires.

Without this information, the engine would not be able to function properly.

Camshaft Position  
Sensor - Engine ...**

If the camshaft position sensor output has not been directly measured on an automotive scope, there is a possibility that it is a perfectly good sensor and thus the problem lies elsewhere. If a diagnostic was done, and the sensor is out of spec. then it should be replaced.
