ARCHITECTURAL DRAFTING AND DESIGN, 6E is the classic text for all architectural drafters and CAD  
operators, whether beginning, intermediate, or advanced. This full-color, comprehensive edition provides  
the basics of residential design, using various types of projects that a designer or architect is likely  
to complete during the actual design process and is written to meet the most recent editions of IRC and  
IBC. This book begins with information on architectural styles that have dominated the field over the  
last four centuries, followed by basic design components related to the site and structure. Commercial  
drafting, basic materials used for construction, common construction methods and drawings typically  
associated with commercial construction are all covered. An important feature of this best-seller is its  
step-by-step instructions for the design and layout of each type of drawing associated with a complete  
set of architectural plans, with projects that can be completed using either CAD or manual drawing  
methods. Readers will gain the knowledge needed to complete the drawings required by most municipalities  
to obtain a building permit for a single-family residence. Important Notice: Media content referenced
