programming books that have consistently left me scratching my head. I've often wondered if I just didn't have the ability to learn and grasp the subject. But, in this book I've found the answer; I can." - TL Pearce Unleash Your Inner App Developer This second book in the series from Kevin McNeish, winner of the 2012 Publishing Innovation Award, highly acclaimed iOS trainer and conference speaker, and award-winning App Developer, is specifically designed to teach non-programmers Objective-C; the language used to create Apps for the iPhone and iPad. Many books designed for the beginning Apple developer assume way too much. In contrast, this book series assumes you know nothing about programming. Book 2: Flying with Objective-C builds on what you learned in Book 1: Diving In. In the first two chapters, the author helps you understand basic concepts, such as "what is a class?" and "what is an object?" You then learn how to pass messages to objects, and then create your own custom classes. As you go through the book, concepts become more advanced until you reach the final chapters on Advanced-Objective-C and Advanced Messaging. Each concept is accompanied by step-by-step instructions to build an App that shows the real-world use of Objective-C programming features. This is a tremendous aid in helping non-programmers grasp even more advanced concepts. The information in this book is applicable to the latest iOS technologies including iOS 7 and Xcode 5. Includes Step-by-Step Instructional Videos Each exercise in this book has a corresponding movie that demonstrates how to perform the exercise. After trying to solve the exercise on your own, just tap the movie to watch the exercise solved for you in high quality video and narrative Not a "Dumbed Down" Series Ultimately, readers will learn everything that is taught in the regular written-for-programmer books. This series simply provides more background information and more thorough explanations for those who haven't had formal education or a career in software development.

Title 14, Aeronautics and Space, Parts 60-109

The fascinating story of how NASA sent humans to explore outer space, told through a treasure trove of historical documents--publishing in celebration of NASA's 60th anniversary and with a foreword by Bill Nye "An extremely useful and thought provoking documentary journey through the maze of space history. There is no wiser or more experienced navigator through the twists and turns and ups and downs than John Logsdon." -James Hansen, New York Times bestselling author of First Man, now a feature film starring Ryan Gosling and Claire Foy Among all the technological accomplishments of the last century, none has captured our imagination more deeply than the movement of humans into outer space. From Sputnik to SpaceX, the story of that journey--including the inside history of our voyages to the moon depicted in First Man--is told as never before in The Penguin Book of Outer Space Exploration. Renowned space historian John Logsdon traces the greatest moments in human spaceflight by weaving together essential, fascinating documents from NASA's history with his expert narrative guidance. Beginning with rocket genius Wernher von Braun's vision for voyaging to Mars, and closing with Elon Musk's contemporary plan to get there, this volume traces major events like the founding of NASA, the first American
