Beth Simmons demonstrates through a combination of statistical analysis and case studies that the ratification of treaties generally leads to better human rights practices. She argues that international human rights law should get more practical and rhetorical support from the international community as a supplement to broader efforts to address conflict, development, and democratization.

Deliver a detailed and focused Child Development course with the 7th edition of this textbook from Pamela Minett, designed to cover all the relevant topics in concise and highly illustrated chapters. - Quickly access individual topic areas with concise, focused and clearly laid out chapters. - Build knowledge and understanding with ongoing summative questions at the end of each chapter. - Engage learners with 100s of illustrations and photographs to support understanding of key concepts. - Suitable for all Level 1 and Level 2 specifications.

The process of user-centered innovation: how it can benefit both users and manufacturers and how its emergence will bring changes in business models and in public policy. Innovation is rapidly becoming democratized. Users, aided by improvements in computer and communications technology, increasingly can develop their own new products and services. These innovating users—both individuals and firms—often freely share their innovations with others, creating user-innovation communities and a rich intellectual commons. In *Democratizing Innovation*, Eric von Hippel looks closely at this emerging system of user-centered innovation. He explains why and when users find it profitable to develop new products and services for themselves, and why it often pays users to reveal their innovations freely for the use of all. The trend toward democratized innovation can be seen in software and information products—most notably in the free and open-source software movement—but also in physical products.

Von Hippel's many examples of user innovation in action range from surgical equipment to surfboards to software security features. He shows that product and service development is concentrated among "lead users," who are ahead on marketplace trends and whose innovations are often commercially attractive. Von Hippel argues that manufacturers should redesign their innovation processes and that they should systematically seek out innovations developed by users. He points to businesses—the custom semiconductor industry is one example—that have learned to assist user-innovators by providing them with toolkits for developing new products. User innovation has a positive impact on social welfare, and von Hippel proposes that government policies, including R&D subsidies and tax credits, should be realigned to eliminate biases against it. The goal of a democratized user-centered innovation system, says von Hippel, is well worth striving for. An electronic version of this book is available under a Creative Commons license.

Exam Board: Cambridge Level: KS4 Subject: Sport First Teaching: September 2016 First Exam: June 2017 Support your teaching of the new Cambridge Technicals 2016 suite with Cambridge Technical Level 3 Sport, developed in partnership between OCR and Hodder Education; this textbook covers each specialist pathway and ensures your ability to deliver a flexible course that is both vocationally focused and academically thorough. Positive Mental Health for Children and Adolescents: Fighting Stigma and Promoting Resiliency examines the main mechanisms involved in improving mental health in children and adolescents, including social and biological processes, as well as effective treatments. By taking into account diverse settings and cultures, the book combines academic, research, and clinical contributions and sets forth how it can be translated into effective clinical practice. In addition, the book promotes the study, treatment, care, and prevention of mental and emotional disorders and disabilities involving children, adolescents, and their families, and includes emerging knowledge on mental health problems and good practice in child and adolescent psychiatry as relayed by experts from around the world. Focuses on the empirical evidence base for work in child and adolescent mental health Appraises the available evidence and underscores where it is lacking Demonstrates the implementation of research into practice Highlights the relevance of existing knowledge for clinical management Considers service and policy implications

Children live in rapidly changing times that require them to constantly adapt to new economic, social, and cultural conditions. In this book, a distinguished, interdisciplinary group of scholars explores the issues faced by children in contemporary societies, such as discrimination in school and neighborhoods, the emergence of new family forms, the availability of new communication technologies, and economic hardship, as well as the stresses associated with immigration, war, and famine. The book applies a historical, cultural, and life-course developmental framework for understanding the factors that affect how children adjust to these challenges, and offers a new perspective on how changing historical circumstances alter children's developmental outcomes. It is ideal for researchers and graduate students in developmental and educational psychology or the sociology and anthropology of childhood.
