Protesters invited Bachelet to visit Maracaibo, a city that has collapsed under constant blackouts, fuel shortages and problems with security and health services. One of the chants during the protests included "Maduro is Pinochet", referring to Chilean dictator Augusto Pinochet, who jailed and tortured Bachelet and members of her family, killing her father. Introduces dictatorships, discussing the social, political, economic, religious, and cultural effects, and examining the efforts of various nations to move beyond dictatorships.

Throughout history cities have been at the center of warfare, from sieges to street-fighting, from peace-keeping to coups de mains. Sun Tzu admonished his readers of The Art of War that the lowest realization of warfare was to attack a fortified city. Indeed, although strategists have advised against it across the millennia, armies and generals have been forced nonetheless to attack and defend cities, and victory has required that they do it well. In Concrete Hell Louis DiMarco has provided a masterful study of the brutal realities of urban warfare, of what it means to seize and hold a city literally block by block. Such a study could not be more timely. We live in an increasingly urbanizing world, a military unprepared for urban operations is unprepared for tomorrow. Di Marco masterfully studies the successes and failures of past battles in order to provide lessons for today's tacticians.

A compelling new argument to help us understand why authoritarian militaries sometimes fight very well—and sometimes very poorly. Talmadge's framework for understanding battlefield effectiveness focuses on four key sets of military organizational practices.

This study explores the genesis of the civil war in Somalia by analysing the defeat of Somalia in the

1977 Ogaden war, asserting that this defeat, which was prompted by the intervention of the USSR, was a turning point which unleashed long term socio-political forces that led to the collapse of the central government of the country. Muuse Yuusuf analyses the history of the Somali civil war, from 1977 to the present, and the role played by various actors in the conflict such as local clans, warlords and foreign powers, and examines the present day by-products of the war, such as religious extremism. Crucially, Yuusuf looks beyond the mainstream explanation for the conflict – that of rival clans fighting over resources. By recognising the impact of foreign military interventions in Somalia, from superpower rivalry during the cold war to the war-on-terror, on the initiation and perpetuation of the Somali conflict, the book attempts to identify foreign military intervention as a new paradigm in the discourse around it.

In the early 1930s, the Motor City was sputtering from the Great Depression. Then came a talented Detroit Tigers team, steered by player-manager Mickey Cochrane, to inject new pride into the Detroit psyche. It was a cast of colorful characters, with such nicknames as Schoolboy, Goose, Hammerin' Hank and Little Tommy. Over two seasons in 1934 and 1935, the team powered its way to the top of the baseball world, becoming a symbol of a resurgent metropolis and winning the first-ever Tigers championship. This exhaustively researched account provides an in-depth look into a remarkable period in baseball history.

Discusses the influence of Mussolini, Hitler, and Stalin on the twentieth century, describes India's efforts to achieve independence, and recounts the founding of Communist China

Brennan's book surveys the history of the Roman praetorship, which was one of the most enduring Roman political institutions, occupying the practical center of Roman Republican administrative life for over three centuries. The study addresses political, social, military and legal history, as well as Roman religion. Volume I begins with a survey of Roman (and modern) views on the development of legitimate power—from the kings, through the early chief magistrates, and down through the creation and early years of the praetorship. Volume II discusses how the introduction in 122 of C. Gracchus' provincia repetundarum pushed the old city-state system to its functional limits.
