Close up photography
is the act of
photographing objects

Access Free Close Up And

Macro photography is the act of photographing subjects close up. Such as flowers or insects in close range so the subject you are photographing fills the frame. In other words, it's the act of photographing subjects close up.

This is easily achievable with any lens, even a 300mm telephoto lens. Macro photography is in essence close up

The camera lens you use is the real defining difference between close up and macro photography.

Anyone can take a close-up picture, such as with a telephoto lens. But generally, macro photography can only be created with a macro lens.

These pricy lenses allow you to capture

Access Free Close Up And

the detail of an insect's head, or the texture of a flower petal.

Knowing the
Difference Between
Macro, Micro, and
Close-Up ...

Macro photography is one that takes close-up shots of small objects, such as seeds, bath bubbles,

Access Free Close Up And

Macro and flowers. Strictly speaking, for photos to be considered macro images, the subject has to be magnified to larger than its life-sized equivalent. Macro photos can be captured in an indoor studio or in an outdoor environment.
