Course: Fundamental Financial Accounting Concepts 8th Edition by Edmonds/McNair/Olds is ideal for the undergraduate introductory financial accounting course, specifically for those wanting to focus on the relationships between business events and financial statements. This text is also appealing to those instructors looking for a shorter text that focuses more on "key" financial accounting concepts rather than rather than procedural details, and to those desiring a stronger user orientation in their course.

Overview: Students are often overwhelmed by the amount of information presented in the introductory financial accounting course.
