Fifty years of church teaching on education. Written by Jim Gallagher SDB who has been involved in the development of catechesis and education for all of those fifty years. In this book he describes the ideals that have guided his work in education and celebrates the arrival of Pope Francis as a pope who is also a teacher.

Although Hopi carver Brian Honyouti (1947-2016) was deeply embedded in his culture and produced ritual artworks throughout his life, he nevertheless also created unique commercial artworks. The latter, the focus of this volume, increasingly diverged from the world view embodied in Hopi art, ceremony, and philosophy to become a new form of

storytelling. While it is unlikely that anyone familiar with Hopi carvings (dolls) would look to Honyoutis artworks expecting to unearth political, social, or environmental truths and circumstances, these are, nonetheless, the messages he determined to convey. In *Brian Honyouti: Hopi Carver*, art historian Zena Pearlstone explores the ideas Honyouti sought to communicate through his work. She examines as well how he transmitted them by turning a traditional art form, the carved representations of katsinas, into a modernistic critique of local Native American and global concerns. It is as a result of these universal implications that Honyoutis art will endure. Because Honyoutis attachment to Hopi culture was so profound, he veiled his critical reflections with humor and imagination to avoid exposing too much to public scrutiny. Feeling that there should be a public record of his intentions, however, he set aside many of his self-imposed limitations when he agreed to collaborate with Pearlstone. It was his hope that having made his intentions public for the first time, his work would be seen as a window into Hopi life as well as a reflection of contemporary mainstream American society.

Economics is the nexus and engine that runs society, affecting societal well-being, raising standards of living when economies prosper or lowering citizens through class structures when economies perform poorly. Our society only has to witness the booms and busts of the past decade to see how economics profoundly affects the cores of societies around the world. From a household budget to international trade, economics ranges from the micro- to the macro-level. It relates to a breadth of social science disciplines that help describe the content of the proposed encyclopedia, which will explicitly approach economics through varied disciplinary lenses. Although there are encyclopedias of covering economics (especially classic economic theory and history),

Why We Teach Now dares to challenge current notions of what it means to be a “highly qualified teacher” á la No Child Left Behind, and demonstrates the depth of commitment and care teachers bring to their work with students, families, and communities. This sequel to Nieto’s popular book, Why We Teach, features powerful stories of classroom teachers from across the country as they give witness to their hopes and struggles to teach our nation’s children. Why We Teach Now offers us the voices of teachers like 42-year veteran Mary Ginley, who wonders, “Why would anyone with any brains and imagination ever want to be a teacher?” Who then answers her own question affirmatively, “It’s because somehow, even today, even with all the insanity, all the rules, all the poorly designed textbooks, all the directives to teach to the test, there are kids out there who need good teachers.” At a time when politicians, policymakers, and philanthropists are

quick to denigrate teachers' work and arrogantly speak for the profession, *Why We Teach Now* offers teachers the room and respect to speak for themselves. Once again, Nieto gives teachers and those who care about education the inspiration and energy to embrace their role as advocates—a role that is vital not only for the well-being of students but also for the future of the profession and our nation. Praise for *Why We Teach*: “These pieces reveal the passion and hope that keep people in the classroom. Inspiration and information, *Why We Teach* raises our understanding of the dedication that fuels people's commitment to this profession.” —*Rethinking Schools* “This collection of essays written by teachers from across the country demonstrates exactly why there is hope for our public schools. Their words reveal why—in spite of bureaucracy and low pay—they continue to teach. This book should be required reading for college students planning to enter the profession. Teachers already in the classroom, whether for five years or twenty-five, will be encouraged and inspired.” —VOYA

This edition of the U.S. Geological Survey (USGS) Minerals Yearbook discusses the performance of the worldwide minerals and materials industries during year 2013 and provides background information to assist in interpreting that performance. These annual reviews are designed to provide timely statistical data on mineral commodities in various countries. This volume covers data from Asia and the Pacific. Each report includes sections on government policies and programs, environmental issues, trade and production data, industry structure and ownership, commodity sector developments, infrastructure, and a summary outlook. Audience: Government employees and contractors, as well as businesses and employees, all working in mineral-related trades, especially with interests in statistics about mineral commodities overseas, will find this resource invaluable.

Inspire your students to develop their sociological imaginations in Our Social World. Focused on deep learning rather than memorization, this book encourages readers to analyze, evaluate, and apply information about the social world; to see the connection between the world and personal events from a new perspective; and to confront sociological issues on a day-to-day basis. Organized around the "Social World Model", a conceptual framework used across chapters
