"A World in the Making is a kind of anthropological journey taken by four historians that assumes all societies are "hot," and all people make history and always have. We argue in our emphasis on lives and livelihoods for a world constructed, altered, renovated, remade by ordinary people even as we acknowledge the genius of individual innovators, disruptors who broke the mold or struck out in some new direction."--Provided by publisher.

While Earth is constantly changing, evidence shows that humans are speeding up the process of the greenhouse effect. Extreme weather, plant and animal extinction, and reshaping of our coastlines are harmful effects of rising temperatures. Understand the causes of global warming and explore ways we can reduce our carbon footprint and impact on the planet in this dynamic science book. Teach readers about climate and weather, the carbon cycle, deforestation, melting ice caps, renewable energy, and more through this high-interest informational text filled with vibrant photographs. Aligned to the Next Generation Science Standards, a hands-on "Think Like a Scientist" lab activity and a "Your Turn" page at the end of the book support STEM Education and provide young scientists with an opportunity to apply what they've learned in the text. Helpful diagrams and text features, such as a glossary and index, are also included to reinforce content-area literacy and improve close reading. This 6-Pack includes six copies of this Level V title and a lesson plan that specifically supports Guided Reading instruction.

The International Space Station (ISS) is a great international, technological, and political achievement. It is the latest step in humankind's quest to explore and live in space. The research done on the ISS may advance our knowledge in various areas of science, enable us to improve life on this planet, and give us the experience and increased understanding that can eventually equip us to journey to other worlds. As a result of the Station s complexity, few understand its configuration, its design and component systems, or the complex operations required in its construction and operation. This book provides high-level insight into the ISS. The ISS is in orbit today, operating with a crew of three. Its assembly will continue through 2010. As the ISS grows, its capabilities will increase, thus requiring a larger crew. Currently, 16 countries are involved in this venture. The sophisticated procedures required in the Station's construction and operation are presented in Amazing 3D Graphics generated by NASA 104 pages of spectacularly detailed color graphics the Space Station as you've never seen it before!

This breakthrough volume details the psychological and interpersonal skills needed to meet the practical challenges of building, developing, adapting, training, and managing multicultural global teams. Its self-regulation approach offers cognitive keys to understanding and embracing difference and its associated complexities for successful global collaborations and lasting results. From this foundation, the book moves on to the various roles of leadership in facilitating team process, from establishing trust to defusing conflicts, reducing biases, and using feedback effectively. This synthesis of research and practice effectively blends real-world experience and the science of global team leadership to address the complex issues facing modern organizations. Core skills covered by the book: Structuring successful global virtual teams. Developing cross-cultural competencies through global teams. Managing active faultlines and conflicts in global teams. Coaching global teams and global team leaders. Utilizing feedback effectively across cultures. Meeting the global need for leaders through Guided Mindfulness. Leading Global Teams is mind-opening reading for students, scholars, and practitioners in industrial and organizational psychology, organizational behavior, work psychology, and applied psychology programs looking for the most current research and best practices regarding its timely subject.

A look at the top 300 most powerful players in world capitalism, who are at the controls of our economic future. Who holds the purse strings to the majority of the world's wealth? There is a new global elite at the controls of our economic future, and here former Project Censored director and media monitoring sociologist Peter Phillips unveils for the general reader just who these players are. The book includes such power players as Mark Zuckerberg, Bill Gates, Jeff Bezos, Jamie Dimon, and Warren Buffett. As the number of men with as much wealth as half the world fell from sixty-two to just eight between January 2016 and January 2017, according to Oxfam International, fewer than 200 super-connected asset managers at only 17 asset management firms—each with well over a trillion dollars in assets under management—now represent the financial core of the world's transnational capitalist class. Members of the global power elite are the management—the facilitators—of world capitalism, the firewall protecting the capital investment, growth, and debt collection that keeps the status quo from changing. Each chapter in Giants identifies by name the members of this international club of multi-millionaires, their 17 global financial companies—and including NGOs such as the Group of Thirty and the Trilateral Commission—and their transnational military protectors, so the reader, for the first time anywhere, can identify who constitutes this network of influence, where the wealth is concentrated, how it suppresses social movements, and how it can be redistributed for maximum systemic change.

Crater Lake is one of Earth's most precious jewels. Ann and Myron Sutton have captured the beauty and majesty of this awesome place, with breathtaking images and richly descriptive text.

Why a return to sound money is our only hope for a true recovery and a healthy global economy "Money clearly illustrates that sound money is an essential foundation for a free and prosperous society and that the Federal Reserve's current policies are a greater threat to the economic future of the U.S. than government deficit spending. This is an important book well worth reading." -- John A. Allison, President and CEO, Cato Institute, and author of the New York Times bestselling The Financial Crisis and the Free Market Cure "Few topics today are as misunderstood as the subject of money. Steve Forbes understands money better than most heads of state do, and in this provocative book he shares his vast knowledge and gives us sensible and time-tested recommendations for stopping future financial meltdowns." -- Lawrence Kudlow, CNBC Senior Contributor "Economic and monetary policies can be difficult to master for even the savviest politicians. Money effectively communicates these complexities into a cohesive argument for economic recovery and preventing a new financial crisis. Steve Forbes and Elizabeth Ames deliver a gripping read and an intriguing viewpoint on how to get our economy back on track." --Greta Van Susteren, host of On the Record, Fox News Channel "Few topics are as misunderstood today as the subject of money. Since the U.S. abandoned a gold-linked dollar more than four decades ago, the world's governments have slid into a dangerous ignorance of the fundamental monetary principles that guided the world's most successful economies for centuries. Today's wrong-headed monetary policies are now setting the stage for a new global economic and social catastrophe that could rival the recent financial crisis and even the horrors of the 1930s. Coauthored by Steve Forbes, one of the world's leading experts on finance, Money shows you why that doesn't need to happen--and how to prevent it. After reading this entertaining and hugely well-informed book, you will know more about money than most people in the highest government positions today. Money explains why a return to sound money is absolutely essential if the U.S. and other nations are ever to overcome today's problems. Stable money, Steve Forbes and Elizabeth Ames argue, is the only way to a true recovery and a stable and prosperous economy. Today's system of fluctuating "fiat" money, in which governments manipulate the value of the dollar and other currencies, has been responsible for the biggest economic failures of recent decades, including the 2008 financial crisis, from whose effects we continue to suffer. The Obama/Bernanke/Yellen Federal Reserve and its unstable dollar policies are accelerating our course toward disaster, the authors show, in numerous convincing examples. In Money, Forbes and Ames answer these crucial questions: What is the difference between money and value? What is real wealth? How does sound money contribute to a well-functioning society? How have our money policy errors led to the current problems in global financial markets? What can we do now to reestablish the strength of the dollar and other currencies? The authors argue that the most effective way to return to a sound money policy and a healthy economy is to put the dollar back on a gold standard, and they outline the several different forms a gold standard could take. They also share invaluable suggestions for how to preserve our wealth and where to invest our money. Money is essential reading for anyone interested in this crucially important subject.

A groundbreaking chronicle of the birth--and death--of a pair of jeans, that exposes the fractures in our global supply chains, and our relationships to each other, ourselves, and the planet Take a look at your favorite pair of jeans. Maybe you bought them on Amazon or the Gap; maybe the tag says "Made in Bangladesh" or "Made in Sri Lanka." But do you know where they really came from, how many thousands of miles they crossed, or the number of hands who picked, spun, wove, dyed, packaged, shipped, and sold them to get to you? The fashion industry operates with radical opacity, and it's only getting worse to disguise countless environmental and labor abuses. It epitomizes the ravages inherent in the global economy, and all in the name of ensuring that we keep buying more while thinking less about its real cost. In Unraveled, entrepreneur, researcher, and advocate Maxine Bédat follows the life of an American icon--a pair of jeans--to reveal what really happens to give us our clothes. We visit a Texas cotton farm figuring out how to thrive without relying on fertilizers that poison the earth. Inside dyeing and weaving factories in China, where chemicals that are banned in the West slosh on factory floors and drain into waterways used to irrigate local family farms. Sewing floors in Bangladesh and Sri Lanka are crammed with women working for illegally low wages to produce garments as efficiently as machines. Back in America, our jeans get stowed, picked, and shipped out by Amazon warehouse workers pressed to be as quick as the robots primed to replace them. Finally, those jeans we had to have get sent to landfills--or, if they've been "donated," shipped back around the world to Africa, where they're sold for pennies in secondhand markets or buried and burned in mountains of garbage. A sprawling, deeply researched, and provocative tour-de-force, Unraveled is not just the story of a pair of pants, but also the story of our global economy and our role in it. Told with piercing insight and unprecedented reporting, Unraveled challenges us to use our relationship with our jeans--and all that we wear--to reclaim our central role as citizens to refashion a society in which all people can thrive and preserve the planet for generations to come.
