Sometimes, getting over pain and betrayal means Getting Up, Getting Even and Getting a Better Man! Astrid has planned out her perfect wedding. That is before she found out that her fiance, Bryan, is cheating on her with her cousin-slash-best-friend-slash-maid-of-honor, Geena. Worse, Bryan got Geena pregnant. Just when Astrid thought it couldn't get any worse, she received an invitation telling her that her Fairy Tale wedding will happen exactly the way she planned it. Except that she is no longer going to be the bride! So when her parents urged her to attend the wedding "as family," she planned the perfect revenge. She hired Ryder, the smoking hot bartender she met, to pretend to be the perfect Prince Charming--rich, smart and totally in love with her. Ryder pulled off the role quite well. And soon, everybody thought Astrid was really with a smoking hot guy who wears expensive suits on a daily basis, drives a luxurious sports car, and is totally in love with her. Ryder pulled off the role quite

well. And soon, everybody thought Astrid was really with a smoking hot guy who wears expensive suits on a daily basis, drives a luxurious sports car, and is totally in love with her. Astrid invented the perfect guy every girl would kill to date, and every ex-boyfriend would hate to be compared with. Or did she really just invent him? What if she really did kiss a frog and tamed a beast? And her quest for revenge was really the start of her happily ever after?

Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after

colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

America's secret lies in the liberties that Americans and others see incarnated in the daily life of the land--its courts, its marketplaces, its schools and churches, its families and friendships. From the records of many of these places comes this collection of patriotic quotes that will inspire the hearts and souls of all Americans to stand united against the forces of terror.

In *Too Much Free Speech?*, Randall P. Bezanson takes up an essential and timely inquiry into the Constitutional limits of the Supreme Court's power to create, interpret, and enforce one of the essential rights of American citizens. Analyzing contemporary Supreme Court decisions from the past fifteen years, Bezanson argues that judicial interpretations have fundamentally and drastically expanded the meaning and understanding of "speech." Bezanson focuses on judgments such as the much-discussed *Citizens United* case, which granted the full measure of constitutional protection to speech by corporations, and the *Doe vs. Reed* case in Washington state, which recognized the signing of petitions and voting in elections as acts of free speech. In each case study, he questions whether the meaning of speech has been expanded too far and critically assesses the Supreme Court's methodology in reaching and explaining its expansive conclusions. Bezanson's measured approach and deep insights reveal the complexities of speech in the realms of human behavior and constitutional law. His wide-ranging analysis of relevant Supreme Court cases arms readers with the facts and perspectives necessary to reach independent conclusions about whether the Court's conduct befitted the independent judicial branch and to understand the consequences of its decisions for a representative democracy.

New edition of the popular textbook, comprehensively updated throughout and now includes a new dedicated website for gas dynamic calculations. The thoroughly revised and updated third edition of Fundamentals of Gas Dynamics maintains the focus on gas flows below hypersonic. This targeted approach provides a cohesive and rigorous examination of most practical engineering problems in this gas dynamics flow regime. The conventional one-dimensional flow approach together with the role of temperature-entropy diagrams are highlighted throughout. The authors—noted experts in the field—include a modern computational aid, illustrative charts and tables, and myriad examples of varying degrees of difficulty to aid in the understanding of the material presented. The updated edition of Fundamentals of Gas Dynamics includes new sections on the shock tube, the aerospoke nozzle, and the gas dynamic laser. The book contains all equations, tables, and charts necessary to work the problems and exercises in each chapter. This book's accessible but rigorous style: Offers a comprehensively updated edition that includes new problems and examples. Covers fundamentals of gas flows targeting those below hypersonic. Presents the one-dimensional flow approach and highlights the role of temperature-entropy diagrams. Contains new sections that examine the shock tube, the aerospoke nozzle, the gas dynamic laser, and an expanded coverage of rocket
