$x + x = 2x$. In the general equal $y = mx + b$, b is the y-intercept. $2x + 4 = 6x$. The slope of a line is positive if you go up as you move from right to left. The product of 3 and -2 is. The slope of a horizontal line is 0. The sum of 3 and -2 is. x times $x = 2x$. The solution (s) for this inequality is (are) $x - 3 > 6$.

Homework Helpers: Basic Math and Pre-Algebra will help build a solid mathematical foundation and enable students to gain the confidence they need to continue their education in mathematics. Particular attention is placed on topics that students traditionally struggle with the most. The topics are explained in everyday language before the examples are worked. The problems are solved clearly and systematically, with step-by-step instructions provided. Problem-solving skills and good habits, such as checking your answers after every problem, are emphasized along with practice problems throughout, and the answers to all of the practice problems are provided. Homework Helpers: Basic Math and Pre-Algebra is a straightforward and easy-to-read review of arithmetic skills. It includes topics that are intended to help prepare students to successfully learn algebra, including: Working with fractions Understanding the decimal system Calculating percentages Solving linear equalities Graphing functions Understanding word problems

From geometric and numerical patterns to graphing non-linear figures, 50 reproducible activities make pre-algebra less intimidating by exploring why formulas work rather than just having students memorize them. Students work individually or in groups on lessons covering variables, numerical relationships, equations, and patterns. Teacher pages give you objectives, prerequisite lessons, materials needed, and procedures for each activity.

Your students will develop a greater understanding of the math concepts required for mastery of the new NCTM Standards. Easy-to-follow instructions, fun-to-solve puzzles and riddles, and many self-checking activities make these books a hit in any middle school math class.

Pre-algebra text with accompanying workbook and teacher's materials provides a program in mathematics which is a transition from arithmetic to algebra. Includes decimals, number theory, equations, percent, ratio, area and volume, statistics, and square roots.

Middle school and junior high school students will benefit from the 71 lessons covering all the necessary math facts to successfully begin Algebra 1. The topics covered are addition, subtraction, multiplication and division of Whole Numbers, Decimals and Fractions plus proportions, per cents, solving linear equations and easy story problems.
