The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

Guide students through the new syllabus with a full-colour, revised edition of a well-known and trusted title, and prepare them for post-secondary and professional studies in Accounting. - Ensure students understand a range of theoretical and practical techniques used in accounting. - Enable students to participate more effectively and responsibly in today's business environment and improve management of budgeting, savings and investment. - Navigate the revised syllabus with ease with a book matching the structure and coverage, as well as including a detailed section on the Student Based Assessment with an annotated example to help students when planning their own. - Prepare for examinations with the 'Helpful hints' feature, containing study tips, practice tips and examiner tips; practice questions are also included in the Student eTextbook. - Make topics relatable with case studies included.

This volume contains the answers to all the questions asked in the companion volume Success in Principles of Accounting (third edition). Together, these texts offer an introduction to book-keeping and accounting for students taking examinations such as: LCCI Book-keeping (First and Second levels); Pitman Book-keeping and Accounts (Elementary and Intermediate); RSA Accounting (Stage II); GCSE Accounting; and ACCA (Foundation stage). They also cover the book-keeping and accounting skills required for an Intermediate or Advanced GNVQ (Vocational GCSE or Vocational A Level) in Business Studies, and should be helpful to those starting A Level Accounting or taking pre-vocational courses in business and finance, distribution or public administration.

A less-expensive grayscale paperback version is available. Search for ISBN 9781680922936. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.
