This title was first published in 2001. Given current movements in global culture, technology, mobility, economic integration and regime transformation, what is it that can or does hold a community or political entity together? From a variety of perspectives, this text examines the cultural politics of nationalism, especially in the context of American culture and European politics where it is undergoing the most scrutiny. The first part of the volume explores the debates on the politics of national identity that surround global information and consumer distribution systems like the Internet. The second part offers a number of case studies of European domestic and foreign policy issues directly affected by arguments about cultural identity that have taken shape in the context of an increasingly global environment. Of particular interest in this volume is the tension often felt between France and the USA on the issue of culture, politics and nationalism.

In the last two decades, Chinese transnationalism has become a distinctive domain within the new "flexible" capitalism emerging in the Asia-Pacific region. Ungrounded Empires maps this domain as the intersection of cultural politics and global capitalism, drawing on recent ethnographic research to critique the impact of late capitalism's institutions--flexibility, travel, subcontracting, multiculturalism, and mass media--upon transnational Chinese subjectives. Interweaving anthropology and cultural studies with interpretive political economy, these essays offer a wide range of perspectives on "overseas Chinese" and their unique location in the global arena.

The culture wars - intertwining art, culture, and politics - have sparked prominent political debates across the globe for many years, but particularly in Europe and America since 2001. Focusing specifically on the experience of Denmark during this period, Culture War aims to analyse and understand the rise of right-wing nationalism in Europe as part of the globalisation and mediatisation of the modern nation state and the culture war and affective politics arising from it. This culture war provides an example of an affective cultural politics in which institutional structures become entwined with media representations, events, and patterns of belonging. Employing a detailed and critically reflective argument covering social media, television, political campaigns, advertising, and 'artivism,' Camilla Møhring Reestorff refuses the traditional distinction between the world of visual culture and the political domain, and she provides multiple tools for understanding the dynamics of contemporary affective cultural politics in a highly mediatised environment.

The role and influence of intellectuals is one of the flashpoints in the recurring debate on the nature and dimensions of French fascism. At the forefront of this debate are a group of emerging writers, collectively known as the Young Right. Though thoroughly schooled in the reactionary nationalism of Charles Maurras' Action française, whose orbit they entered in the early 1930s, they were soon seduced by the mobilizing force of neighboring fascist movements and regimes. Led by two precocious literary talents, Robert Brasillach and Thierry Maulnier, the Young Right set themselves to rejuvenating French nationalism and winning a place for France in an emerging new Europe. Their project - an attempt to graft lessons from foreign sources onto a native language of French generational and cultural politics - was one of several efforts to create a distinctive French fascism.

In this book Professor Barnett analyzes a successful political movement in South India that used cultural nationalism as a positive force for change. By exploring the history of the Dravida Munnetra Kazhagam party, the author provides a new perspective on political identity. In so doing, she challenges the interpretation of cultural nationalism as a product of atavistic and primordial forces that poses an

inherent threat to the integrity of territorially defined nation-states and thus to the progress of modernization. The founding of the DMK party in 1949, the author shows, was a turning point in the political history of Tamil Nadu, South India, because it ushered in the era of Tamil cultural nationalism. In the hands of the DMK, Tamil nationalism became an ideology of mass mobilization and thus shaped the articulation of political demands for a generation. The author analyzes the social, political, and economic factors that gave rise to cultural nationalism; the interplay between cultural nationalist leaders; and the role of cultural nationalism in a heterogeneous nation-state. Highlighting the crucial yet largely overlooked role played by society's middle layers in the historical development of Latin America, Patrick Barr-Melej provides the first comprehensive analysis of the rise of Chile's middle-class reform movement and its profound impact on that country's cultural and political landscapes. He shows how a diverse collection of middle-class intellectuals, writers, politicians, educators, and bureaucrats forged a "progressive" nationalism and advanced an ambitious cultural-political project between the 1890s and 1940s. Together, reformers challenged the power of elite groups and sought to quell working-class revolutionary activism as they endeavored to democratize culture and fortify liberal democracy. Using sources that range from archival documents and newspapers to short stories, novels, and school textbooks, Barr-Melej examines the reform movement's cultural ideas and their political applications, especially as they were articulated in the areas of literature and public education. In the process, he provides a new framework for understanding Chile's cultural and political evolution, as well as the complicated place of the middle class in a society experiencing the swift changes inherent in capitalist modernization.

This book addresses the centrality of race and racism in consolidating the nationalisms currently prominent in Brexit Britain. Particular attention is given to the issues of refugees, borders and bordering, and the wider forms of nativist and anti-Muslim sentiments that anchor today's increasingly populist forms of nationalist politics. It is argued that the forms of scapegoating and alarmism integral to the revival of nationalism in British politics are fundamentally tied to racialised processes. Equally however, it is argued that such a political climate is not simply discursive, but

also yields acute forms of governance, wherein an increasingly violent attention is given by the state to the border. The chapters in the book do however also attempt to think through the possibilities of a constructive response to this moment. Emphasis is given here to the everyday cultural textures that might help shape a popular opposition to racial nationalism. Similarly, the book attempts to unpack the appeal of today's distinctive populism in ways that might be more responsive to anti-racist and anti-nationalist sentiments. Racial Nationalisms will be of interest to academics and researchers studying postcolonialism, nationalism, ethnic and racial studies, and to advanced students of sociology, political science and public policy. This book was originally published as a special issue of the journal Ethnic and Racial Studies.
