In 1120, the Moors established Europe's first paper mill at Valencia, Spain (then called Xativa). From there, this Chinese invention passed to Italy, Germany, and other parts of Europe. Paper helped spread knowledge, much of which was gleaned from the great Asian culture centers along the Silk Road, that enabled Europe's High Middle Ages.

By the 7th century, papermaking had spread to Korea and Japan, and by the 8th century (via regional conflict or the Silk Road, depending on whom you ask) it had made its way to the Islamic world, where the earliest paper mills (the most significant innovation in papermaking technology since moulds were first employed shortly after Cai Lun 's era) are known to have been utilized to make the process more efficient, and thereby more profitable as a major industry.

What trouble have Ting, Pan, and Kùai gotten into now? When they 're caught playing at school instead of doing their math, the teacher gives them the usual punishment: he writes notes to Mama and Papa on the brothers' hands and demands that they hold them up for everyone to see. These kids will be the laughingstock of the entire village! The boys wish they could invent something for the teacher to write on besides their hands... something small and private. Can the creative Kangs concoct a formula for what just may become a very useful school supply? Enjoy the fourth adventure of the Kang brothers who discovered some of China's most amazing inventions — now with a new bilingual Chinese translation!

Ting, Pan, and Kùai are tired of working in the rice fields, protecting the harvest from the birds. They try everything -- they bang pots, blow whistles, and wave their arms. If only they could fly, they 'd drive those birds away forever! Then the boys get an idea: if they made wings, they could fly! Using paper, straw, and feathers, the boys try to launch themselves into the sky from the hilltop above the rice fields. Kersplash! What else can the Kang boys come up with to keep those naughty birds away from their rice? Enjoy the third adventure of the Kang brothers who discovered some of China's most amazing inventions — now with a new bilingual Chinese translation!

Englisch-Lernende. Just smashing! Die 13-jährige Maya kann sich in ihrer Klasse nicht durchsetzen. Ihre drei Erzfeindinnen Delia, Manuela und Isabelle lassen keine Gelegenheit aus, sie zu triezen. Und da ist der machthungrige André, der mit seinen Kumpels ständig für Unruhe sorgt. Außerdem wird sie zu Hause vom strengen Vater unter Druck gesetzt. Doch Mayas Leben wird auf den Kopf gestellt, als der freche, angeberische Domenico neu in die Klasse kommt. Das ist das, was ihr gerade noch gefehlt hat: Domenico sieht einerseits so gut aus, dass sie in seiner Gegenwart weiche Knie bekommt. Andererseits ist er ihr ein wenig ungeheuer. Trotzdem kommt Maya dem mysteriösen Jungen aus Sizilien viel, viel näher als je gedacht ...

The book describes how Lisa Meitner, of Jewish heritage, found herself working as a physicist at the Kaiser Wilhelm Institute in Berlin when the Nazis came to power in 1933; how she was hounded out of the country and forced to relocate to Sweden; how German chemists Otto Hahn and Fritz Strassman continued with the project on the effect of bombarding uranium (the heaviest known element at the time) with neutrons, a project which Lise herself had initiated, being the intellectual leader of the group. It describes how Hahn and Strassmann, with whom she kept in touch, came up with some extraordinary results which they were at a loss to explain; how Lise, and her nephew Otto Frisch, who was also a physicist, confirmed what they had achieved - the splitting of the atom, no less, and provided them with a theoretical explanation for it. This laid the foundation for nuclear power, medical-scanning technology, radiotherapy, electronics, and of course, the atomic bomb - the creation of which filled Lise with horror. It describes the crucial part that Lise played in our

understanding of the world of atoms, and how deliberate and strenuous attempts were made to deny her contribution; to belittle her achievements, and to write her out of the history books, even though Albert Einstein said she was even more talented than Marie Curie herself. The author is fortunate and honoured to have been granted several interviews with Lise's nephew Philip Meitner himself a refugee from the Nazis - who with his wife Anne, provided much valuable information and many photographs.

"The Amazing Story of the Fantasticks is the detailed history of how this fabulously successful show by Tom Jones and Harvey Schmidt came into being and how and why it succeeded. In tracing the evolution of the show from an idea to a cultural phenomenon, the book takes readers through the countless auditions to attract backers, the search for theaters to hold tryouts (which indicated disaster), and eventual popular success. Among the actors who have performed in the musical are Anna Maria Alberghetti, Richard Chamberlain, Elliott Gould, Bert Lahr, Liza Minnelli, Robert Goulet, and Glenn Close."--Jacket.

This is the first of three volumes that chart the history of the science fiction magazine from the earliest days to the present. This first volume looks at the exuberant years of the pulp magazines. It traces the growth and development of the science fiction magazines from when Hugo Gernsback launched the very first, *Amazing Stories*, in 1926 through to the birth of the atomic age and the death of the pulps in the early 1950s. These were the days of the youth of science fiction, when it was brash, raw and exciting: the days of the first great space operas by Edward Elmer Smith and Edmond Hamilton, through the cosmic thought variants by Murray Leinster, Jack Williamson and others to the early 1940s when John W. Campbell at *Astounding* did his best to nurture the infant genre into adulthood. Under him such major names as Robert A. Heinlein, Isaac Asimov, A. E. van Vogt and Theodore Sturgeon emerged who, along with other such new talents as Ray Bradbury and Arthur C. Clarke, helped create modern science fiction. For over forty years magazines were at the heart of science fiction

and this book considers how the magazines, and their publishers, editors and authors influenced the growth and perception of this fascinating genre.

Growing up in middle class Toledo, Ohio in the 1980s career choices were somewhat limited to working in factories or in the medical field. I came from a very stable home as the oldest of six kids with two hard working parents that provided for us but didnt spoil us. Our parents gave us a private education grades 1 - 12 and my Father helped get me a summer job to pay for college at the local General Motors plant where he worked. In college I had two majors, one in Political Science and one in Communications. As part of my Communications major I got an internship at the local rock n roll radio station which resulted in becoming the morning show producer for the the well known morning show team of Karlson and McKenzie with that radio station. This story is about what happened from there. Its about dealing with the unpredictable changes that happen with your company and your career and what happens when they overlap. Its also a story about who and what can influence your decision to stay, or to leave.

You are the dreamer of dreams and have the ability to tell the most amazing stories from the secret places that you visit. Give yourself a title, draw and picture and then write the story. Ideal gift for those young at heart to be the creator of masterpieces. A great gift for kids, teens and creative adults.
