methods and computational models.

This book was developed by the editors  
as a complement to Volume 4 on failure  
in composite materials. These two  
volumes are a great resource to bring  
the reader up-to-date on failure and  
damage.

**DEStech Publishing**

Damage to composites is often hidden to the eye. Where a metal structure will show a “dent” or “ding” after being damaged, a composite structure may show no visible signs of damage, and yet may have delaminated plies or other damage within. Impact energy affects the visibility, as well as the severity, of
