tions of physical chemistry. We believe that an experimental physical chemistry course should serve a dual purpose: (1) to illustrate and test theoretical principles, and (2) to develop a research orientation by providing basic experience with physical measurements that yield quantitative results of important chemical interest.

Experiments in Physical Chemistry

Experimental Physical Chemistry We measure the physical properties that lead to molecular behavior and reactivity. Through a combination of state-of-the-art facilities and the interdisciplinary nature of our program, researchers explore physical chemistry in solids, liquids and gases, and the interfaces where they meet.

Java-Based Virtual Chemistry Experiments. The original tutorials employ Physlets and Chemistry Applets to simulate experiments or depict molecular and atomic structure. The guiding concept is to involve the read in making observations and acquiring data, and then using this information to draw conclusions and infer chemical principles.
