Salmon Restoration in Washington State Works! It works for the fish and the restored watersheds but it also works for people. Salmon restoration is part of the green economy. Those employed to develop, design, engineer and construct salmon projects have so-called green jobs that contribute to restoring and protecting our environment.

### Salmon Restoration in Washington State with NOPLÉ

Urban waterfronts are rarely designed to support biodiversity and other ecosystem services, yet have the potential to provide these services. New approaches that integrate ecological research into the design of docks and seawalls provide opportunities to mitigate the environmental impacts of urbanization and recover ecosystem function in urban waterfronts.
