PracticePlanner - MyCIS Home | MyCIS

Abstract. Historically, the medical care of persons with severe and persistent mental illness (SPMI) has been suboptimal. In many communities, large gaps exist in the continuum of services necessary to meet the medical needs of those patients, and existing services are not well coordinated. The effect of the managed mental health care on patients with SPMI remains to be seen, but it does not bode well for patients who are already at risk for being undertreated.

Primary care for those with severe and persistent mental ...

Some examples of mental illness include anxiety, depression, eating disorders, addiction, and bi-polar. Due to the stigma and unpredictability of mental illness, many are reluctant to seek treatment which often leaves those living with a disorder feeling isolated, alone, and forgotten about.
